52 classifier-specific cases; original 3-speed censored MLE retained
A Minimum obstruction does not imply MLE leverage
B Fixed witnesses span the control influence ranks
Reduction of profiled likelihood contrast T
positive = less contrast after deletion
B repeat 2, 0.05 m/s
p = -1.2
target p=-2
target p=-1.2
Movement of fitted beta exponent toward target
positive = closer after deleting the certificate
Fraction of selected certificates
p=-2 (n=13)
p=-1.2 (n=39)
visual reference; not a null test
Rank of |beta change| among ALL size-matched deletions
from the same eligible speed folder
